Self-taught Full-Stack Developer with a passion for crafting innovative digital solutions. With a strong problem-solving mindset and a knack for staying up-to-date with industry trends, I thrive on turning complex challenges into elegant, user-centric web applications. My journey of self-education reflects my dedication to continuous learning and my commitment to delivering high-quality, scalable, and engaging web solutions.

SKILLS

JavaScript | TypeScript | React | Next | Node | Amazon S3 | NextAuth | Tailwind CSS | Git | Frontend | Backend
Android | Unity 3D | Game Development | Adobe Photoshop | Adobe Illustrator | Adobe Premiere Pro | HTML | CSS

PROJECTS

Full-Stack Web Application - **Moments by Kerri Coy** | <https://www.momentsbykerricoy.com>

- Built a responsive full-stack web application from the ground up to elevate my mother's photography business.
- Leveraging Next.js and React.js, I crafted an engaging user experience, while Tailwind CSS ensured a sleek and responsive design.
- Fully functional contact form that sends potential client information to my mother's business email.
- To ensure scalability and ease-of-use I integrated AWS S3 for seamless image storage and retrieval.
- An admin page was built with fully functioning image management tools that were developed and designed for my mother to quickly upload and delete her photos directly from the site.
- Security was paramount, so I implemented NextAuth.js for authentication to lock down the admin page.

QUALIFICATION HIGHLIGHTS

- Supported Shopify e-commerce site across multiple platforms (mobile, tablet, desktop) as well as supporting third-party and internal applications.
- Worked closely with Senior Developers to enhance/learn new skills and best practices.
- Consistently managed and closed internal tickets, as well as communicated on and assisted with cross-functional projects.
- Created manuals, technical documentation, and FAQs, while keeping documentation up-to-date with changes and improvements
- Successfully developed a mobile application to more efficiently implement daily safety checks on 5 factory forklifts, previously done through pen and paper.
- Exercised workplace flexibility by frequently working with a team of four engineers to complete various tasks.
